

# Siddhartha Sinha

## India

**Phone:** 9731227618

**Email:** Siddhartha.Sinha3@ibm.com

## Education

Bachelor of Technology in  
Electrical & Electronics  
Engineering, Gaya College of  
Engineering (AKU University),  
IN, 2021

## Digital Credentials

Practical Introduction to  
Quantum-Safe Cryptography -  
2026

IBM Garage Essentials - 2026

Enterprise Design Thinking  
Practitioner - 2026

Artificial Intelligence  
Fundamentals - 2026

## Languages

English - Fluent

Hindi - Fluent

## Publications

My Dashboard, 2026

## Profile

Application Developer with 4+ years of experience specializing in Frontend/backend engineering, cloud-native microservices, and full-stack development. Strong expertise in Node.js (Express/NestJS), TypeScript, Angular, React, and scalable API design. Proven track record in architecting distributed systems on Azure, AWS, and IBM Cloud, along with hands-on experience in Docker, Kubernetes, and OpenShift. Experienced in CI/CD automation using Jenkins and Azure DevOps, integrating automated testing and secure containerized deployments. Skilled in AI-driven automation, telemetry pipelines, and LLM integrations to enhance backend intelligence and operational insights. A strong collaborator within Agile teams, contributing to sprint planning, design discussions, and code reviews. Passionate about building cloud-native, performant, and maintainable enterprise applications.

## Key skills

### Backend Development & Architecture

- **Languages & Frameworks:** Node.js (Express.js, NestJS), TypeScript, .NET Core, C#, Python
- **Architectural Expertise:** Microservices, Event-Driven Architecture, REST API design
- **Core Concepts:** Design Patterns, Asynchronous Programming, Distributed Systems
- **Additional:** Python ML scripts & automation workflows

### Cloud & DevOps

- **Cloud Platforms:** Azure, AWS, IBM Cloud
- **CI/CD Tools:** Jenkins, Azure DevOps, GitHub Actions
- **Containers & Orchestration:** Docker, Kubernetes, OpenShift
- **Automation:** Infrastructure as Code (IaC), GitOps

### Frontend Development

1. Angular 10+, React.js, Micro Frontends

### Databases

1. SQL Server, PostgreSQL, MongoDB
2. SSIS, ETL pipelines, Data Reconciliation

### AI & Automation

1. LLM Integration (Hugging Face, OpenAI)
2. Telemetry Pipelines, TensorFlow
3. Generative AI, Prompt Engineering

### Testing & Performance

1. Postman, REST Assured, Cypress, Selenium
2. JMeter, Unit & Integration Testing

### Agile & Collaboration

1. Scrum, JIRA, Confluence
2. Sprint Planning, Code Reviews

## Key courses and training

- Google Cloud Associate Engineer
- Microsoft Azure Data Engineer Associate
- MongoDB SI Associate
- Salesforce AI Associate
- Full Stack .NET + Angular (Infosys)
- Dell Associate Administrator – Dell-Boom
- AI Annotation & LiDAR Data Processing – Micro1
- Deep Learning (Advanced) – CutShort
- Jira Certification – LearnTube
- AWS Certified Cloud Practitioner
- Artificial Intelligence - IBM
- IBM Growth Behaviors
- Power Skills: Communication, Presentation, Collaboration
- Power Skills: Resilience, Time Management, Learning Agility

## Work experience

### **Application Developer 6B**

IBM India Pvt. Ltd., India | Jan 2026 - Present

- Developed and enhanced enterprise-grade monitoring dashboards for STC using React.js, JavaScript, HTML, CSS, and REST API integrations.
- Built real-time Service Monitoring Dashboards featuring alerts, analytics, operational KPIs, and map-based monitoring for telecom and cloud infrastructure systems.
- Designed and maintained Cloud NOC (Network Operations Center) Dashboards to provide unified monitoring, ticketing insights, and operational visibility across cloud environments.
- Developed AIOps dashboards to visualize circuit model metrics, execution trends, and performance analytics for operational decision-making.
- Worked extensively on dashboard optimization, UI enhancements, bug fixing, and build/debugging activities in enterprise production environments.
- Integrated JSON-based APIs and collaborated closely with backend teams to ensure accurate real-time data rendering and seamless frontend-backend communication.
- Participated in execution/deployment monitoring systems and internal reporting tools for enterprise operations management.
- Coordinated with cross-functional teams including managers, backend developers, and operations/support teams to deliver scalable and user-friendly solutions.
- Developed responsive frontend applications and reusable UI components using React.js and modern frontend development practices.
- Created an Amazon Homepage Clone project replicating responsive e-commerce UI behavior and modern web design concepts.

### **Senior Systems Engineer**

Infosys Ltd., Mysore, India | Mar 2022 - Dec 2025

- Built scalable Node.js microservices and REST APIs for multiple enterprise customers.
- Led full-stack development using Angular 10+ and React for high-performance client apps.
- Deployed cloud-native workloads on Azure and AWS; implemented ETL processes with SQL Server & PostgreSQL.
- Designed Jenkins + Azure DevOps pipelines; integrated Postman/REST-assured automated testing.
- Delivered performance optimizations using JMeter and observability tools.
- Integrated AI models (LLMs, TensorFlow) into backend workflows for automation and insights.

### **Machine Learning Intern**

Internshala, India | Jul 2021 - Jan 2022

- Built predictive ML models using Python (scikit-learn).
- Applied regression, classification, clustering, random forests, and decision trees on real datasets.
- Developed early telemetry and automation use-cases.
- Completed AI & ML workshop from Finland Labs (IIT Roorkee).

## **Assignment history**

### **Front end Developer**

SAUDI TELEPHONE COMPANY, India | Feb 2026 - Present

Project name: STC WATSON AIOPS

An Application Developer with expertise in Front End translates visual and interactive designs into functional web and mobile applications. They use responsive design and development techniques to create prototypes and perform hands on coding for the application user interface. This involves leveraging technologies such as CSS3, HTML5, PHP, JavaScript, and associated frameworks, AJAX, JSON, jQuery, Dojo, and various APIs

Contribution

Completed:

- Real-Time Service Monitoring Dashboard
- Cloud Network Operations Center (NOC) Dashboard
- Watson AIOPS Analytics Dashboard
- Closed Loop Automation Effectiveness Dashboard
- Telecom Operations Monitoring Dashboard
- Enterprise Deployment Tracking Dashboard

Also solve production Issue of different Dashboard.

## **Additional information**

- Highly adaptable professional with a strong willingness to take on new challenges and responsibilities.
- Fast learner with the ability to quickly grasp new technologies, frameworks, and tools as project needs evolve.
- Proactive in upskilling—regularly completing industry certifications, IBM digital credentials, and advanced training programs.

- Strong passion for exploring modern technologies such as cloud-native architecture, AI/LLM integrations, and automation.
- Comfortable working in dynamic environments, collaborating across multi-disciplinary teams, and contributing immediately.
- Demonstrated ability to learn independently, apply new concepts rapidly, and deliver high-quality outcomes in short timelines.
- Motivated to continuously improve, stay aligned with IBM best practices, and add value to client engagements.
